SMU0297 RE-ENGINEERED

We have re-engineered the SMU0297 to be a smaller OEM sized unit, rather than the larger unit we have been selling in the past.

The pictures above show the unit we have been selling and the newly engineered, smaller unit, comparable to the OEM units it replaces.

We also have indicated in the picture the differences between the SMU0060 (larger and CCW rotation), and the SMU0297 (smaller, and CW rotation). These units sometimes get mixed up, and they are not interchangeable. The dimensions help to see the differences in the two units.
